**Embracing Health Prescription Refill Request Policy - (Effective April 2, 2019)**

**Refill request must be made in-person during an appointment**

Embracing Health will gladly address request for refills during any appointment with a provider or during a nursing visit. If you forget to ask about your refills during a provider appointment, you can call and schedule a one-time nursing visit for no more than a 30-day supply – as long as your refill does not require a lab draw (such as medicines for diabetes, cholesterol, hormone replacement therapy, and thyroid conditions) and is not for: antibiotics, antiviral medicines, or controlled substances. Please note that a copay is required for the nursing visit.

We highly encourage patients prepare for medication refills at each and every visit with our office.

- Before arriving, please look over your medications, diabetes supplies, inhalers etc. to determine if you will need refills.
- We require periodic office visits for all of our patients taking prescription medication. The interval of the visits depend on the type of medication prescribed. Please be sure you have enough medication to last until your next scheduled visit.

Please understand, it is your responsibility to schedule an appointment before you run out of medication. We encourage you to schedule your next visit before you leave our office as a matter of routine. To avoid having an additional nurse visit and copay, make sure your request refills during your appointment.
